

COVER LETTER & CV

Dear Hiring Manager,

I am writing to express my interest in any open software development positions within your esteemed organization. With a Bachelor's degree in Software Engineering from Nangarhar University and several years of hands-on experience in software and database development, I am confident in my ability to contribute meaningfully to your team.

Over the course of my career, I have been involved in the complete software development lifecycle—from requirement gathering and analysis to system design, implementation, testing, and maintenance. I bring solid experience in database development and administration, including schema design, optimization, troubleshooting, and performance tuning. I have also worked on various Management Information Systems (MIS), where I led key aspects of both front-end and back-end development.

I am a goal-oriented professional with strong communication and problem-solving skills, capable of working independently or collaboratively in a team setting. I take pride in producing clean, maintainable code and in delivering high-quality solutions under tight deadlines. My adaptability and eagerness to continuously learn new technologies have enabled me to stay current in the fast-evolving field of software development.

I would welcome the opportunity to further discuss how my skills and background align with your team's needs. Please feel free to contact me at your convenience to arrange an interview.

Thank you for considering my application.

Sincerely,

Zabihullah Hamdard
